

Kingscliff Public School

Excellence, Innovation, Creativity

“I am impressed by the dedication, enthusiasm and warmth shown to the students.”

Sue Ziebell, parent

“The teachers are exceptional and their programs reflect their dedication and enthusiasm. They continually update their teaching and learning methods so that our children can leave the school with the highest level of education they can achieve.

“Apart from programs such as literacy, numeracy, science and computing, the school also offers programs such as debating, public speaking, dance and sport and we have achieved a high level of skill at regional and state level in these fields.

“All students are given the chance to improve themselves academically and socially.”
